Objective

To secure a challenging role as a Software Engineer or Cybersecurity Professional in a reputed organization where I can utilize my skills in programming, cybersecurity tools, and full-stack development, contribute to impactful projects, and continuously grow as a technology professional while achieving organizational goals.

Education

Lovely Professional University

Jalandhar, Punjab

Bachelor of Technology in Computer Science and Engineering, CGPA: 7.25

2023

Relevant Coursework: Data Structures and Algorithms, Operating Systems, Database Management Systems, Artificial Intelligence, Computer Networks, Software Engineering

Deeksha Junior College

Vizag, Andhra pradesh

Intermediate, Percentage: 80.1%

2021

Key Subjects: Physics, Chemistry, Mathematics, Computer Science

Narayana E-Techno School

Vizag, Andhra pradesh

Matriculation, Percentage: 100%

2020

Technical Skills

Programming Languages: Python, Java, C++

Tools/Technologies: Git, Kali Linux, Wireshark, Nmap

Operating Systems: Linux, Windows

Databases: MySQL

Frameworks: React.js, Django

Projects

Project Title: PhishGuard – Phishing Detection System

Description: PhishGuard is a cybersecurity web application that detects phishing websites by analyzing suspicious URLs and identifying malicious patterns to help users verify link safety.

Technologies Used: Python, Django, HTML, CSS, JavaScript, MySQL

Impact/Achievements: Helps users avoid fraudulent websites and protects sensitive information such as login credentials and financial data.

Demo/Code Link: [GitHub Repository](#)

Project Title: Talent-Match-Resume Shortlisting System

Description: a web-based recruitment platform where candidates upload resumes and recruiters post jobs, with automated resume analysis to shortlist the most relevant applicants.

Technologies Used: Python, Django, HTML, CSS, JavaScript

Impact/Achievements: Improved the hiring workflow by enabling automated resume filtering and providing separate dashboards for recruiters and candidates to manage job applications efficiently.

Demo/Code Link: [GitHub Repository](#)

Certifications

Privacy and Security in Online Social Media – [NPTEL\(2025\)](#)

ChatGPT-4 Prompt Engineering: ChatGPT, Generative AI & LLM – [Infosys \(2025\)](#)

Peer-to-Peer Protocols and Local Area Networks – [Coursera \(2025\)](#)

Achievements

Hackverse Hackathon – Qualified for Round 2 (2024).

Gained hands-on experience with cybersecurity tools such as Kali Linux, Wireshark, and Nmap.

AI Recommendations for Improvement

Recommendation 1: Strengthen programming proficiency by improving problem-solving skills in Data Structures and Algorithms using Python and practicing coding problems on platforms such as LeetCode or HackerRank.

Recommendation 2: : Develop additional cybersecurity-focused projects on GitHub such as a phishing detection tool, log analysis system, or network port scanner to demonstrate practical cybersecurity skills.

Recommendation 3: Gain deeper hands-on experience with Linux and security tools such as Nmap, Wireshark, Burp Suite, and Metasploit by performing lab-based penetration testing exercises.

Recommendation 4: Improve understanding of cybersecurity frameworks and standards including OWASP Top 10, NIST Cybersecurity Framework, and ISO/IEC 27001 to align with industry requirements for security analysts.

Self-Assigned Tasks (Till 10th week of this semester)

Task 1: Complete one industry-recognized cybersecurity certification (e.g., CompTIA Security+ or Google Cybersecurity Professional Certificate).

Task 2: Build and publish one cybersecurity project on GitHub (e.g., phishing detection tool, network scanner, or log analysis system).

Task 3 Complete 10+ additional TryHackMe rooms in cybersecurity learning paths to strengthen practical security skills.

Targets Allocated (Till 10th week of this semester)

Targets Approved by Course Instructor

- Complete certification in [Certification Name].
- Enroll in and complete [Specific MOOC or course].
- Finish the project titled "[Project Name]" to strengthen your CV.
